

Portfolio:
Architecture
over Platform

Focus on structure,
not tools

Portfolio as system,
not container

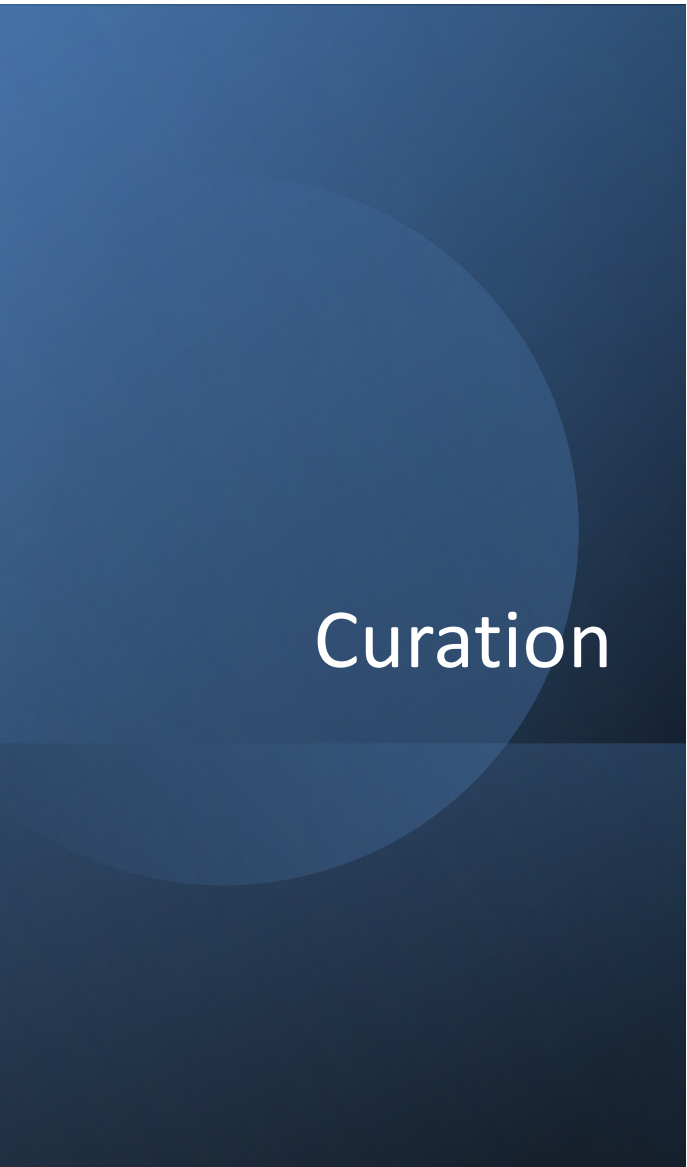

Core Dimensions

Curation — what is included /
excluded

Framing — context, role, contribution

Modality — video, code, audio,
diagrams

Navigation — speed of
comprehension

Curation

Selection defines
identity

Quality > quantity

Remove redundant or
weak work

Framing

What was the problem?

What was your role?

What decisions did you make?

What was the outcome?

Modality

Match

Match medium to discipline

Show

Show, don't describe

Use

Use multiple representations where needed

Navigation

First impression in seconds

Clear hierarchy

Minimize friction

Make value legible quickly

Key
Distinctions

Archive vs Portfolio

Process vs Outcome

Individual vs
Collaborative attribution

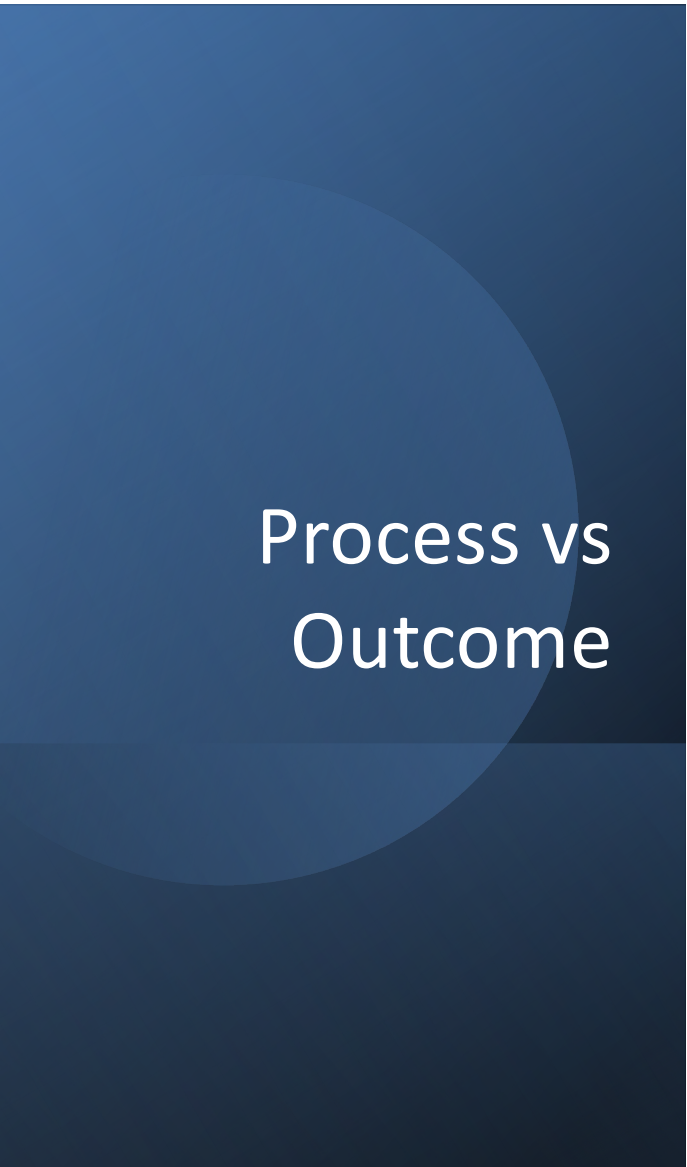

Archive vs Portfolio

Archive = everything

Portfolio = curated
selection

Intentional filtering
required

Process vs Outcome

Outcome shows result

Process shows thinking

Both are necessary

Individual vs Collaborative Work

Clarify your
contribution

Avoid ambiguity

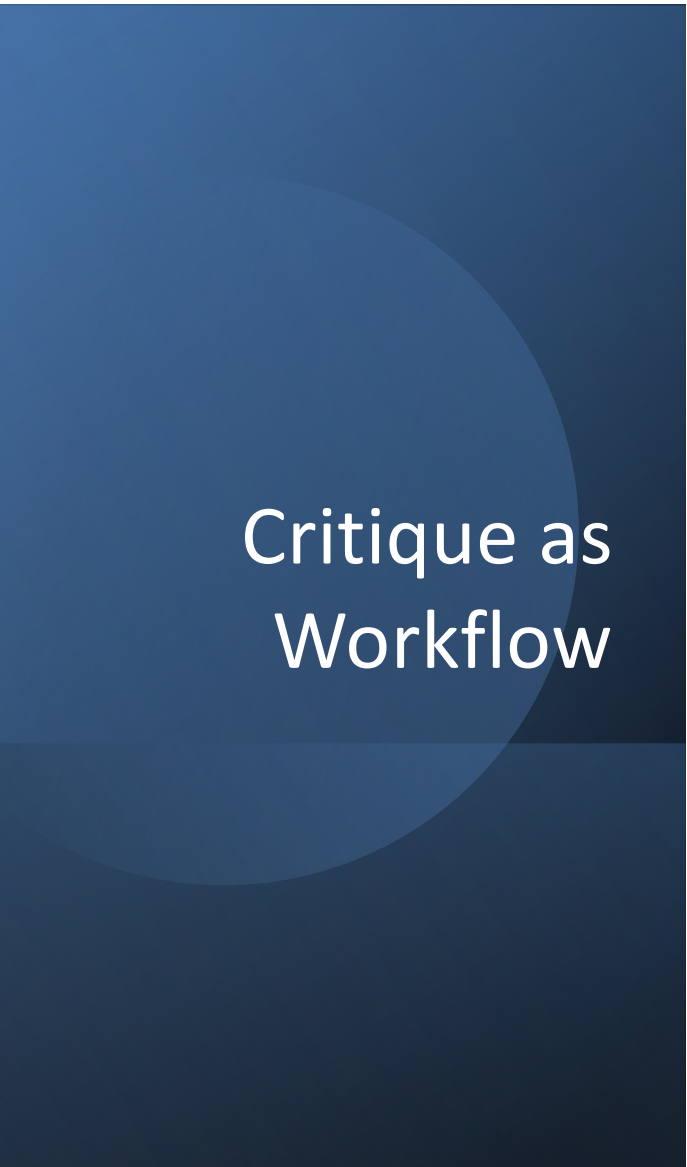

Transparency builds
credibility

Portfolio as
System

Not a final product

Continuously updated

Evolves with your work

Critique as Workflow

Draft → Feedback →
Revision

Mirror production
cycles

Iteration improves
clarity

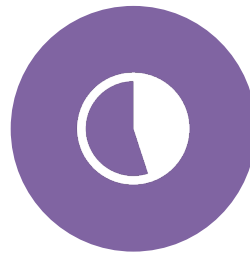

Minimal Viable Portfolio
